elite range of products

- Anti-bacterial powder coating - elite GUARD
- Robust steel construction, 0.7 - 0.9mm steel thickness
- Welded frame design
- Comprehensive locker accessories
- 4000 differ series key cam lock for added security
- Cloakroom equipment available
- Keyless locking options available

These steel coloured lockers are manufactured to the highest specification.

Lockers are welded and riveted in construction. Semi concealed hinges are welded to the door and riveted to the frame, allowing easy replacement of doors. Doors are fixed within a rebated frame to enhance compartment security. Selected doors are reinforced with profiled steel sections. Top and bottom plinths are vented to create an airflow to assist with air changes.

The carcass incorporates nesting holes on all sides and a return flange at the base for extra strength and to reduce floor damage. Lockers are manufactured using CR4 and bright galvanised steel components. Material thickness specification 0.9mm doors and frame, 0.7mm carcass and shelves. Painted components are epoxy polyester powder coated prior to assembly to ensure all surfaces are protected. Nested lockers are manufactured with common sides. The materials used classifies this locker as a fire retardant product meeting the BS Class '0' rating.

Available colour options on selected products. Components are pre-treated with an iron-phosphate chemical process prior to a satin gloss epoxy polyester powder coating paint finish. Bespoke colour options available on application.

DIRECT DELIVERY — Direct deliveries to the end user or traders business address included in the rrp pricing. Deliveries to commercial premises only, does not include deliveries to private addresses. Deliveries to kerbside only, nearest point of entry to the premises. Any delivery restrictions, e.g. size of vehicle, height and weight should be noted at time of order, extra charges will be incurred if a smaller/ non-standard sized vehicle is necessary to complete the delivery. Redelivery charges will apply for a failed delivery. Specific day deliveries can be arranged for full vehicle loads only, extra charges may apply.

elite GUARD — Components of products that feature an epoxy powder coated paint finish will incorporate an anti-bacterial additive which is 99.9% effective against E.coli, MRSA and moulds for the life of the product. These products are ideally suited for use in the healthcare, food, pharmaceutical industries and in areas where hygiene is important.

0·7-0·9mm STEEL — Various products contain a mix of steel finishes and component thicknesses, the icon indicates the range of steel thicknesses used in the product.

ASSEMBLY REQUIRED — Cloakroom island seating is supplied flat packed and will require assembly on site. Freestanding benches supplied assembled. Cloakroom lockers require assembly.

TRAYS PACKAGED SEPARATLEY — Tray storage cupboards will require the trays and runners to be loaded into the cupboard. Instruction guide will be included within the product packaging. The trays and runners are delivered separately from the cupboard.

MANUFACTURED PRODUCTS — 100% manufactured in the UK. Steel sourced from UK steel stockholders. Locker components e.g. locks sourced outside of the UK.

BS 'Class 0' RATING — Locker/cupboard test sample componants complied with the requirements for BS 'Class 0' surface, as defined in paragraph A13 (b) of approved document B, 'Fire Safety', to the building regulations 2000. The result of the tests to BS 476: Part 6:1989+A1: 2009 and BS 476: part 7: 1997, demonstrate that the products, as tested, complies with the requirements for 'Class 0'.

Airflow VENTING SYSTEM — Lockers manufactured with an air-flow venting system incorporated in the top and bottom locker plinth.

- Anti-bacterial powder coating, satin gloss finish
- Robust steel construction with rebated doors and welded frame
- Lockers complemented with sloping tops, stands and combined seat & stand options
- Keyless locking options available

Numbered vinyl labels to help with locker allocation and identification. Black numeric print on white background.

Hanging Rail

Available as an alternative to a double coat hook. Ideal for 450mm deep lockers only. Factory fitted.

Key Fob

Numbered key fob to compliment vinyl numbering. Made from traffolyte material.

£1 Coin Return or Token Return lock. Factory Fitted.

elite school locker guidance

Do you know ?

Steel manufactured standard height compartment lockers at 1800mm high are ideal for senior pupils and reduced height lockers at 1370mm are perfectly suited for younger primary aged children.

For those awkward areas with limited space there are also modular lockers that can be stacked and nested.

There is also a wide choice of coloured door options available to provide a mix of colours e.g. harlequin effect. Standard locker options help when wanting a 'bespoke' locker this includes locker stands, sloping tops, various lock options and complementary cloakroom equipment.

The following check list will give guidance when choosing the correct locker...

Establish the total requirement of compartments, remembering to incorporate potential additional users in the future. ✓

Consider the size of compartment needed e.g. clothes hanging requirement, size of kitbags/rucksacks, etc. Popular locker configurations within educational establishments are 2, 3 and 4 door lockers. ✓

Survey the premises to establish suitable locker locations that are dry, free from excessive moisture, remembering high traffic areas may not be suitable plus any areas exposed to the outdoor elements. ✓

Position lockers in areas that are open to view to assist with deterring vandalism ✓

Carefully consider a suitable locking mechanism, popular options are a key operated cam lock or a padlock fitting. Padlock fittings will accept a key or combination padlock. The minimum shank diameter recommended is 6mm. Additional keyless solutions are featured within the brochure. ✓

Allowing sufficient time from ordering lockers to having them installed. During busy periods of national holidays give as much notice as possible to arrange supply and delivery. ✓

Finally, consider acquiring necessary spare locker components to replace damaged parts e.g. doors, locks etc. Tip... a well maintained locker is less likely to be abused than an unmaintained locker. ✓

Remember to seek guidance from recommended locker suppliers who can offer expert advice on choice and installation. ✓

Excellent

Control of Substances Hazardous to Health Regulations apply to virtually all UK workplaces. There are mandatory requirements for employers to carry out coshh risk assessments. Substances hazardous to health are those products that are capable of causing adverse effects or disease arising out of exposure from work activates.
It is the employers responsibility to gather information on these products and either eradicate the risk or at least control it. Hazardous substances are those chemicals classified by CHIP and the new CLP regulation. Coshh and Acid cabinets are manufactured to the same specification as dangerous substance cabinets.

elite bespoke manufacture

Locker Specification	1800/1950h x 380w x 450d mm. Three door locker with a sloping top and a special postal slot in the door. Supplied with a 4 digit mechanical combination lock and special paint finish
Industry	Commercial offices, London and Birmingham
Clients Brief	"To supply a custom made locker to accept internal mail and provide sufficient storage for personal belongings. Must be keyless locking. Locker finish to complement modern office surroundings"
Special Feature(s)	Manufactured in a special width of 380mm. Doors incorporate a postal slot and a 4 digit mechanical combination lock. Special non-standard colour paint finish applied.

Highlighted on these pages is a showcase of non-standard products that have been manufactured to satisfy specific client requests to manufacture a custom made product.

The featured products illustrate apart from the comprehensive range of standard products, it is possible to incorporate custom features that are either intended to complement the immediate surroundings or to suit the special needs of users.

These features are typically special colours and finishes, the use of special locks, non-standard sizes to maximise awkward spaces and the use of colours for harlequin effects.' Ask the sales representative for details.

Locker Specification	1800 & 1370h x 300w x 450d mm. Two door locker supplied with a padlock fitting. Special combination of coloured doors.
Industry	Education, primary school
Clients Brief	"Provide a storage solution to the problem of having cluttered corridors of jackets and bags plus incorporate a special theme of colours"
Special Feature(s)	Supplied both standard and special sized lockers to maximise limited wall space. Fitted with a padlock fitting to act as a latch lock. Manufactured in a special configuration of coloured doors to give a special effect once installed.

Cupboard Specification	1830h x 1120w x 457d mm. Modified High Capacity Storage Cupboard for bulk storage and removable tray storage.
Industry	Education, Export.
Clients Brief	"A requirement for a flexible storage solution for both bulky items and student's personal work within classrooms"
Special Feature(s)	A customised standard product...the high capacity storage cupboard. Redesigned to accept adjustable shelving plus worktop in the upper section while retaining the individual tray storage facility in the lower section.

Locker Specification	1800h x 225w x 450d mm. Two door locker supplied with a 4 digit mechanical combination lock with master key over-ride.
Industry	Drinks bottling plant
Clients Brief	"To maximise the available floor area to provide as many compartments as possible suitable for hanging garments"
Special Feature(s)	Manufactured to a special width of 225mm to form a slim locker. Presented a keyless solution with master key over-ride.

Locker Specification	1800/1950h x 300w x 450d mm. Two door locker with a sloping top and shoe compartment within the main hanging compartment. Key cam lock.
Industry	Food preparation
Clients Brief	"To maximise compartment space for shoe storage within the same footprint of a standard locker"
Special Feature(s)	Features an extra shelf to form a shoe compartment within a standard sized locker.

Locker Specification	1800h x 600w x 450d mm. Special 14no. compartment unit
Industry	Retail Bank, Export.
Clients Brief	"Design a locker that allows a choice of compartment sizes within a single unit to temporarily store personal items where entry into a bank with bags is prohibited"
Special Feature(s)	Presented a unit with 14no. compartments in total, 8no. of a smaller sized compartment in the top half and 6no. larger in the lower half.

Locker Specification	1800h x 300w x 450d mm. Six door locker supplied with a key cam lock. Special door colours and configuration to give a harlequin effect.
Industry	Sponsored Corporate events
Clients Brief	"Provide a special configuration of corporate colours to give a lasting effect to create brand loyalty"
Special Feature(s)	Supplied a standard sized locker to offer high density storage that offered value for money and a convenient storage solution with a harlequin effect of special corporate colours.

Locker Specification	1800h x 225w x 450d mm. Six door locker supplied with a key cam lock and special door colour
Industry	Retail
Clients Brief	"Provide multi compartment storage within the limited floor space for staff to store small personal possessions"
Special Feature(s)	Manufactured to a special width of 225mm to form a slim six door locker and clients own choice of coloured door.

elite bespoke manufacture

Locker specification	All compartment lockers.
Industry	All industries
Clients Brief	"Investigate the feasibility of a steel locker with a wood effect finish to compete with traditional expensive wood lockers."
Special Feature(s)	Worked closely with a specialist supplier of powder coated finishes. Trials where carried out using a unique formulation to give a quality grained wood effect finish that can withstand severe misuse. Still in development.

Locker Specification	1800h x 300w x 450d mm three door locker with a laminate door and sloping top. Fitted with a type 1 padlock fitting.
Industry	Educational.
Clients Brief	"Required a multi compartment locker that can offer a robust design featuring a rebated door to guard against mis-use."
Special Feature(s)	Incorporates a sloping top to help prevent storage outside the locker. Clutch type padlock to prevent mis-use of the lock. Supplied with an all black carcass with a Fundermax Arctic Punto door finish. The material thickness of the door was 12mm and was maufactured to accept engraved numbering discs for locker identification.

Seat & Stand specification	Locker accessories
Industry	Food and medical industries
Clients Brief	"Source a non-porous material for use with seat and stands to complement a new locker changing room facility."
Special Feature(s)	Offered a solid grade laminate material in place of Beech wood slats. Laminate material is available in many colours and finishes, is hardwearing, easy to clean and is resistant to moisture ingress.

Important factors to consider on locker room design and choice of locker.

The size and choice of the locker compartment type will be determined by the items to be stored e.g. the need to hang garments, size of bags/ holdalls, the storage of motor cycle helmets and footwear etc. There may be a need to keep workwear separately from personal clothing.

If hygiene is important consider a factory fitted sloping top option on lockers. This prevents an unwanted build up of dirt and debris and also encourages storage within the locker and not on top of the locker. Locker stands will raise the locker off the floor to provide cleaning access and clear of harmful floor cleaning chemicals.

In dry changing room environments lockers can be floor mounted. In wet areas it is important to raise the locker off the floor using locker stands.

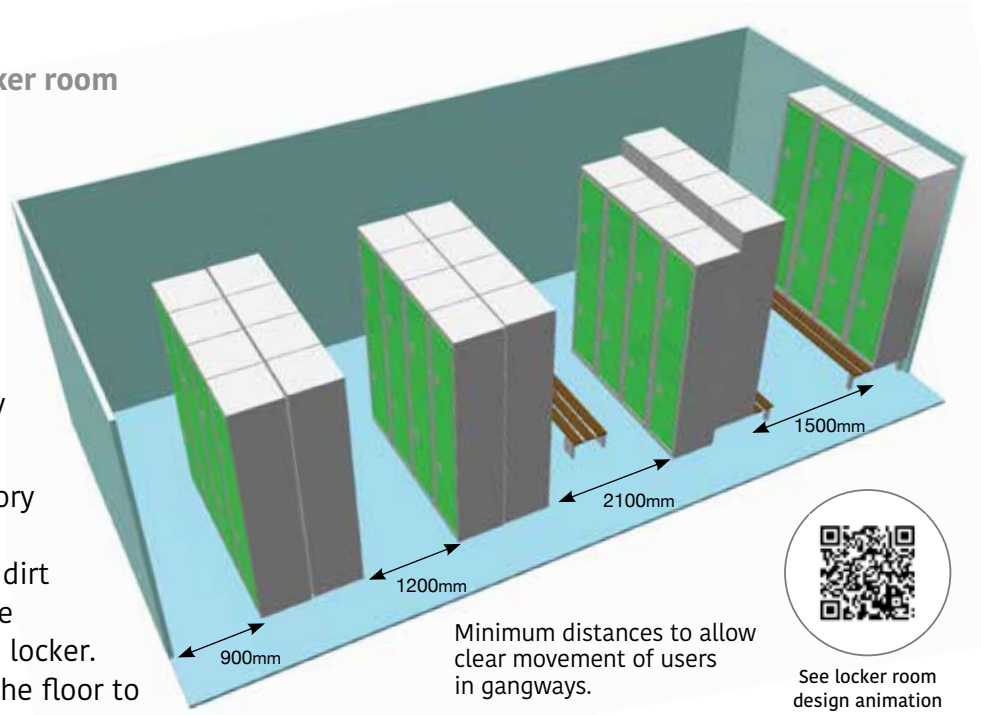
Check floor surfaces are level, lockers are designed to be floor standing. To overcome uneven floors locker stands are supplied with adjustable feet.

If users are changing footwear, it would be useful to offer bench seating or an integral seat and stand option.

If there is a need to air damp clothing - then consider lockers where compartments are big enough to hang garments. Also consider perforated holes in doors to increase air circulation.

Consider the type of lock carefully, the choices are.... key cam lock, padlock type fitting, £1 coin return or token return lock, 4 digit combination locks and electronic rfid locks. Remember during installation to database keys to a locker compartment for easier key management.

Consider additional locker accessories, e.g. hanging rail, vinyl numbering, extra keys, master keys etc.



Minimum distances to allow clear movement of users in gangways.

See locker room design animation

Is there a need for locker compartments to be visually monitored? vision panel doors allow inspection from outside of the locker.

Finally, it is important to consider the factors relating to the delivery of lockers and their installation e.g. how best to manage the removal of old lockers and the contents of the compartments, delivery access – vehicle size restrictions, can the installation be carried out during normal working hours. The availability of suitable handling and lifting equipment, remembering nested lockers are more difficult to handle than single lockers.

General Information

Metal lockers are not intended for use in damp or wet areas. Under the Workplace (Health, Safety and Welfare regulations 1992) employers are required to provide suitable and sufficient accommodation for workwear and personal clothing. The Personal Protective Equipment at work regulations 1992 also require the provision of suitable storage to protect personal protective equipment from damage, contamination or loss.
